

Development instructions

Installation

```
$ git clone https://github.com/RMPR/mutuelle-enseignants.git

$ cd mutuelle-soft

$ composer install
```

Configuration

Database file

After executing the sql script located in /Model and the script fake-data.bat to generate random data Create the file db.php in the config directory with the following content

```
<?php
return [
    'class' => 'yii\db\Connection',
    'dsn' => 'mysql:host=localhost;dbname=mutuelle',
    'username' => 'root',
    'password' => your_root_password,
    'charset' => 'utf8',
    // Schema cache options (for production environment)
    //'enableSchemaCache' => true,
    //'schemaCacheDuration' => 60,
    //'schemaCache' => 'cache',
];
```

Update yii2-user database schema

```
$ php yii migrate/up --
migrationPath=@vendor/dektrium/yii2-user/migrations
```

Update database file

execute the script Model/updateMutuelle.sql

■ *You may need to do composer update sometimes*
